ISO 31000 Certified Risk Manager This training course is an amalgamation of theory (including here the standard ISO 31000 itself, best practices, and other risk management frameworks) and practice (through quizzes, exercises, case studies, and the like). Upon completion of the training course, you can sit for the exam and apply to obtain the "PECB Certified ISO 31000 Risk Manager" credential. The credential demonstrates your knowledge and ability to apply the risk management process in an organization based on the guidelines of ISO 31000 and best practices.

Risks come from multiple sources and can appear in many shapes and sizes. Almost every strategic decision within an organization is accompanied by certain risks that the organization must acknowledge and deal with. Since without taking risks, there is virtually no growth, risk management should be an integral part of the processes in every organization. The ISO 31000 Risk Manager training course helps participants acquire the knowledge necessary and ability to integrate the risk management guidelines of ISO 31000 in an organization. It provides information with regard to the risk management principles and their application, as well as the core elements of the risk management framework and steps for a risk management process. In addition, it provides the basic approaches, methods, and practices for assessing risk in a wide range of situations.

# At the end of this course, the participants should be able to:

- Demonstrate understanding of risk management principles, as formulated in ISO 31000
- Establish, maintain, and continually improve a risk management framework, in accordance with ISO 31000 guidelines
- Apply the risk management process, in accordance with ISO 31000 guidelines
