

Step into a fast-paced, real-world learning experience designed to help you run projects with clarity, control, and confidence—while strengthening the competencies aligned with the PMP® exam. In this immersive five-day program, you'll translate proven global standards and an agile mindset into practical tools you can use immediately: win stakeholder buy-in, lock in scope and success criteria, build an integrated project plan, manage resources and budgets, improve quality and scheduling, and stay ahead of risk, change, and issues. Walk away with a complete, end-to-end approach to delivering measurable value—plus the language, structure, and best practices that elevate your credibility as a project leader.

What's more, this course fully satisfies the 35 contact hours required to apply for the PMP® Exam! Take the first step in becoming a globally certified Project Management Professional.

At the end of this course, participants should be able to

- Use core project management concepts and principles—plus agile approaches and tailoring—to select the right way of working for any project.
- Kick-start projects with strong foundations: craft a clear vision, engage stakeholders early, align expectations, and set fit-for-purpose governance.
- Define scope, value, and success criteria you can manage—then keep delivery on track while meeting compliance requirements.
- Build an integrated project management plan and apply practical methods to manage resources and control project finances.
- Plan procurement, bake in quality, and build schedules that improve predictability—so teams deliver what matters, when it matters.
- Communicate with impact, ensure knowledge transfer, and lead teams through conflict with confidence and professionalism.
- Stay in control as work evolves: manage risks, control changes, and resolve issues; monitor performance to keep stakeholders aligned; and close projects cleanly while capturing lessons to fuel continuous improvement.
